

1 Yleistä tietoa

Hyvä asiakas,

Olemme iloisia, että valintasi kohdistui tuotteeseemme!

Ole hyvä ja lue kokoamisohje huolellisesti ennen pystytyksen aloittamista! Tämä auttaa välttämään ongelmia ja säästää aikaa.

Suosituksia:

- Säilytä pystytystä odottava mökkipaketti kuivassa paikassa, joka ei ole suorassa kosketuksessa maan kanssa, ja säältä suojassa (kosteus, aurinko jne.). Älä pidä pakettia lämmitetyssä tilassa!
- Valitessasi mökille paikkaa varmista, ettei se tule joutumaan alttiiksi äärimmäisille sääoloille (voimakkaalle lumentulolle tai koviille tuulille); muuten se tulee kiinnittää (esim. ankkureilla) maaperään.

Takuu

Mökkisi on valmistettu korkealuokkaisesta kuusesta ja toimitetaan luonnollisessa (käsittelemättömässä) muodossa. Mikäli perusteellisesta tarkastuksestamme huolimatta sinulla on tuotteesta huomautettavaa, ole hyvä ja toimita täytetty valvontailmoitus ja ostolasku tuotteen myyjälle.

HUOM! Muista säilyttää mökkipaketin mukana tulevat asiakirjat! Valvontailmoituksessa on tuotteen valvontanumero. Mahdollisten valitusten käsittely edellyttää, että mökin valvontanumero ilmoitetaan myyjälle!

Takuu ei kata seuraavia:

- Puun erikoispiirteet luonnonmateriaalina
- Puuosat, jotka on jo maalattu (käsitelty kyllästysaineella)
- Puuosien oksakohdat silloin, kun ne eivät vaaranna mökin vakautta
- Puun rakenteesta johtuvat sävyerot, jotka eivät vaikuta puun kestävyteen
- Puuosissa olevat (kuivumisen aiheuttamat) pienet halkeamat/raot, jotka eivät mene puun läpi, eivätkä vaikuta talon rakenteeseen
- Taipuneet puosat, jotka voidaan kaikesta huolimatta asentaa
- Katto- ja lattialaudat, joiden piiloon jäävällä puolella saattaa olla höyläämättömiä kohtia, värieroja tai vajasärmä
- Valitukset, jotka johtuvat mökin virheellisestä pystytyksestä tai puutteellisen perustuksen aiheuttamasta vajoamisesta
- Valitukset, jotka johtuvat mökkiin oma-aloitteisesti tehdyistä muutoksista, kuten taitamattomasta käsittelystä johtuva puuosien ja ovien/ikkunoiden vääntyminen; jäykisteiden liian tiukka asentaminen, ovenkarmien ruuvaaminen seinäpuihin yms.

Takuun piiriin kuuluvat huomautukset hoidetaan vaihtamalla viallinen/väärä materiaali uuteen. Muita mahdollisia vaateita ei huomioida!

Mökin maalaaminen ja huolto

Puu on luonnonmateriaali, joka laajenee ja elää sääolojen mukaan. Pienet ja suuret raot, värisävyerot ja -muutokset sekä puun rakenteen vaihtelu eivät ole virheitä, vaan ne johtuvat puun laajenemisesta ja luonnonmateriaalin ominaisuuksista.

Käsittelemätön puu (lattiapalkkeja lukuun ottamatta) muuttuu ajan myötä harmahtavaksi, ja saattaa sinertyä ja homehtua. Tämän vuoksi mökin puuosat tulee välittömästi suojata kyllästysaineella.

Lattialaudat kannattaa käsitellä etukäteen värittömällä puunkyllästysaineella, etenkin lautojen alapinnat, joihin ei pääse käsiksi enää mökin pystytyksen jälkeen. Se on ainoa keino estää kosteutta imeytymästä puuhun.

Myös ovet ja ikkunat tulee käsitellä kyllästysaineella niin sisä- kuin ulkopuolelta! Muuten on vaara, että ovet ja ikkunat vääntyvät.

Mökin pystytyksen jälkeen se kannattaa käsitellä kauttaaltaan sään vaikutuksilta suojaavalla maalilla, joka suojaa puuta kosteudelta ja UV-säteilyltä.

Maalatessa käytä laadukkaita työvälineitä ja maaleja, noudata maalausohjetta sekä valmistajan turvallisuus- ja käyttöohjeita. Älä koskaan maalaa suorassa auringonpaisteessa tai sateella. Kysy asiantuntijalta käsittelemättömälle havupuulle sopivista maaleista ja noudata maalinvalmistajan ohjeita.

Asianmukainen maalaus pidentää rakennuksen käyttöikää huomattavasti. Suosittelemme, että tarkastat mökin huolellisesti joka kuuden kuukauden välein.

2 Pystytyksen valmistelu

Työkalut ja osien valmistelu

Mökin pystyttämisessä tarvitaan seuraavia työkaluja:

apulainen

tikkaat

vasara

vatupassi

ruuvimeisseli

saha

veitsi

rullamitta

pihdit

pora

NEUVU: Tikkujen välttämiseksi käytä asianmukaisia suojakäsineitä kokoamisen aikana.

Toivotamme menestystä mökin kokoamisessa ja kosolti iloa sen parissa tulevina vuosina!

1 Generelt

Kære kunde,

Tak fordi du valgte vores havehus!

Venligst læs hele monteringsvejledning igennem før du går i gang for at undgå unødvendig tidsspilde og problemer!

Tips:

- Opbevar pakken med havehuset tørt, beskyttet mod vejr og vind og ikke direkte på jordoverfladen indtil monteringen er afsluttet. Pakken må ej heller være i nærheden af en varmekilde.
- Ved placeringen af havehuset vær opmærksom på, at huset ikke kommer til at stå i ekstreme vejrforhold (stærk vind, meget sne i.lign.), i så fald skal huset fæstnes med passende ankere til grunden.

Garanti

Havehuset er fremstillet af højkvalitativ gran tømmer og leveres i ubehandlet stand. Hvis der på trods af vores grundig kvalitetskontrol skulle være klager eller mangler ved huset, skal disse indgives til sælgeren sammen med udfyldt kontrolskema og indkøbskvittering.

OBS: Venligst opbevar vedlagte dokumentation til havehuset! Husets kontrolnummer fremgår af kontrolskemaet. Klager kan kun indgives hvis I oplyser kontrolnummeret til sælgeren.

Garantien omfatter ikke følgende:

- Ujævnheder og afvigelser grundet træets naturlige egenskaber
- Detaljer som allerede er behandlet med træbeskyttelse
- Detaljer som indeholder hele knaster der ikke påvirker husets stabilitet
- Afvigelser i træets farvenuancer som ikke påvirker træets levetid
- Detaljer som indeholder små sprækker opstået ved tørning der ikke er gennemgående og som ikke påvirker husets konstruktion
- Trædetaljer med skævhed, der stadig kan monteres
- Tag- og gulvbrædder, der indeholder uhøvlede pletter, farveafvigelser eller andre pletter i ikke synlige steder
- Klager der opstået pga. ukyndig montering af huset eller ved placeringen af huset på et ukorrekt udført fundament
- Klager, der er opstået pga. egne tiltag eller ændringer ved huset, såsom skævhed af trædetaljer, døre og vinduer pga. ukyndig behandling af træet; stormlisternes for stram montering; dørkarme fastmonteret i vægdetaljer o.lign.

Garantien udøves ved at ombytte den fejlbehæftede element med en ny. Alle andre krav tilgodeses ikke!

Havehusets maling og vedligeholdelse

Træ er et naturmateriale, der bevæger sig afhængigt af vejrforhold. Små og store sprækker, farveafvigelser og ændringer, samt ændret træstruktur er ikke fejl, men træets egenskaber som naturmateriale.

Ubehandlet træ (undtagen fundamentalsprosser) ændres efterhånden til gråligt, kan endda blive blåligt og muggent. For at beskytte dit havehus og dens trædele bedst, skal du så hurtigt som muligt behandle træet med træbeskyttelse.

Vi anbefaler først at behandle gulvbrædder med et ufarvet træbeskyttelse, specielt bræddernes underside, som ikke vil være tilgængeligt for yderligere behandling efter monteringen. Kun på den måde kan man forhindre fungten at trænge ind.

Vi anbefaler, at du behandler også døre og vinduer med træbeskyttelse. Det er vigtigt at behandle døre og vinduer både på inder- og ydersiden! Ellers kan de trække sig skæve efterhånden.

Efter monteringen af huset anbefaler vi brugen af en passende maling for at beskytte ydersiden mod vejr, vind og UV-stråling.

Brug højkvalitative redskaber og maling under malingsarbejdet, følg instruktioner og anbefalinger fra malingsproducenten. Mal aldrig i direkte sollys eller i regnvejr. Søg tips og råd hos din malingsforhandler og følg deres instruktioner.

Regelmæssig maling af havehuset forlænger betydeligt dets levetid. Vi anbefaler en grundig gennemgang af huset ved hvert halve år.

2 Forberedelse for montage

Redskaber og forberedelse af alle elementer

For monteringen har du brug for følgende redskaber og værktøj:

en hjælper

stige

hammer

vatterpass

skruetrækker

sav

kniv

målebånd

tang

boremaskine

TIPS: For at undgå splinter anbefaler vi brug af arbejdshandsker.

**Pøj-pøj med monteringen af Dit nye havehus!
Vi håber, I får glæde af det mange år frem i tiden!**

1 Algemene informatie

Geachte klant,

Wij zijn zeer verheugd dat U beslist heeft in het voordeel van ons tuinhuis!

Lees deze handleiding aandachtig alvorens te starten met de montage van het tuinhuis! U zal zo problemen voorkomen en geen tijd verliezen.

Aanbevelingen:

- Bewaar het bouwpakket op een droge plaats tot het volledig gebouwd is, maar niet in direct contact met de grond en beschermd tegen weersomstandigheden (vochtigheid, zonlicht, enz.). Bewaar het pakket niet in een verwarmde ruimte!
- Wanneer U de locatie kiest voor het tuinhuis, let er dan op dat het enerzijds niet onderhevig is aan extreme weersomstandigheden (plaatsen met zware sneeuwval of winden); anderzijds bevestigt U het huis best (bv. met ankers) aan de ondergrond.

Garantie

Uw huis is gemaakt van hoogwaardige vuren hout en geleverd in natuurlijke (onbehandelde) vorm. Als, ondanks onze gedegen inspectie, U toch klachten zou hebben, stuur dan het ingevulde controleblad en de aankoopfactuur naar de verkoper..

OPGELET: Gelieve de bij Uw bouwpakket gevoegde documentatie te bewaren! Het controleblad bevat het controlenummer van Uw tuinhuis. We kunnen enkel klachten behandelen indien U het controlenummer aan Uw verkoper bezorgt!

De garantie dekt niet:

- Eigenaardigheden van hout als natuurlijk materiaal
- Houten reeds geschilderde delen (behandeld met een houtbeschermingsmiddel)
- Knoesten in het hout die de stabiliteit van het tuinhuis niet in het gedrang brengen
- Kleurschakeringen veroorzaakt door verschillen in houtstructuur die de levensduur van het hout niet beïnvloeden.
- Houten afwerkingsstukken (veroorzaakt door het drogen) kleine scheuren en openingen die geen invloed hebben op de structuur van het tuinhuis
- Verwongen houten afwerkingsstukken, als ze desondanks toch kunnen geïnstalleerd worden.
- Dak- en vloerpanelen die op verborgen plaatsen ongeschaafde plekken, kleurverschillen en tanning kunnen vertonen.
- Klachten voortkomend uit een incompetente wijze van installeren van het tuinhuis of het naastgelegen huis tengevolge van een incompetente fundering.
- Klachten veroorzaakt door het aanbrengen van zelf-geïnitieerde wijzigingen, zoals het vervormen van houten details aan deuren/ramen tengevolge van incompetente behandeling van het hout; aan het tuinhuis, het te vast bevestigen van stormankers, deurlijsten die worden vastgeschroefd aan wand logs, etc.

De klachten gedekt door garantie zijn beperkt tot het vervangen van gebrekkig/foutief materiaal. Alle andere vragen worden uitgesloten!

Tuinhuis, schilderen en onderhoud

Hout is een natuurlijk materiaal, zet uit en past zich aan aan de weersomstandigheden. Grote en kleine scheuren, kleurverschillen en – veranderingen, net als een veranderende houtstructuur zijn geen fouten, maar een resultaat van het uitzetten van het hout en van de aard van het hout als natuurlijk materiaal.

Onbehandeld hout (behalve de funderingsbalken) kan grijs worden als het een tijd met rust wordt gelaten, het kan blauw en schimmelig worden. Om de houten details van Uw tuinhuis te beschermen, moet U ze onmiddellijk behandelen met een houtbeschermingsmiddel.

We raden aan dat U de vloerdelen met een kleurloze middel impregneert, vooral de onderkanten, die U niet meer kan bereiken eens het tuinhuis is geassembleerd. Alleen zo voorkomt U het doordringen van vocht.

We raden absoluut aan om ook de deuren en ramen kleurloos te impregneren, zowel aan de binnen- als aan de buitenkant! Anders kunnen ze verwrongen geraken.

Nadat het tuinhuis volledig is geassembleerd, bevelen we als finale afwerking het aanbrengen van een dekkende verf aan die het hout zal beschermen tegen vocht en UV-straling.

Gebruik bij het schilderen kwaliteitsgereedschap en –verven, Volg de bij de verf geleverde veiligheidsgebruikshandleiding. Schilder nooit een oppervlak in felle zon of bij regenweer. Consulteer een specialist betreffende verven die geschikt zijn voor onbewerkt hout en volg de instructies van de verffabrikant.

Het degelijk schilderen van Uw tuinhuis zal de levensduur ervan aanzienlijk verlengen. We raden U aan het tuinhuis elke zes maanden grondig te inspecteren.

2 Voorbereiding voor montage

Gereedschappen en voorbereiding van de onderdelen

Om het tuinhuis te monteren, zal U volgende gereedschappen nodig hebben:

montagesteun

ladder

hamer

waterpas

schroevendraaier

zaag

mes

rolmeter

knijptang

boormachine

Raadgeving: Om splinters te vermijden, raden we U aan de overeenkomstige beschermende handschoenen te dragen tijdens het montageproces.

We wensen U alle success met Uw tuinhuismontage en heel veel plezier ermee in de komende jaren!

1 Üldinfo

Lugupeetud klient,

Meil on hea meel, et olete otsustanud meie aiamaja kasuks!

Palume Teil enne maja paigaldamisega alustamist montaažjuhend väga hoolikalt läbi lugeda! Nii väldite probleeme ja asjatut ajakulu.

Nõuanded:

- Säilitage majapakki kuni lõpliku kokkumonteerimiseni kuivas kohas, vältides otsesest kokkupuudet maapinnaga ning kaitstuna ilmastikutingimuste (niiskus, päike jms) eest. Ärge hoidke majapakki kuumaks köetud ruumis!
- Aiamaja asukoha valikul jälgige, et maja ei jääks ekstreemsete ilmastikuolude meelevalda (tugeva lumesaju või tuulega piirkonnad), vastasel korral peaksite maja kinnitama (nt ankrute abil) aluspinnase külge.

Garantii

Teie maja on valmistatud kõrge kvaliteetsest kuusepuidust ja tarnitakse naturaalsel (töötlemata) kujul. Kui hoolimata meie põhjalikust kontrollist peaks kaebusi esinema, esitage kauba müüjale täidetud kontroll-leht ja ostuarve.

TÄHELEPANU: Palume kindlasti säilitada maja juurde kuuluv dokumentatsioon! Kontroll-lehelt leiate maja kontrollnumbri. Kaebustega saab arvestada ainult juhul, kui Te edastate müüjale maja kontrollnumbri!

Garantii alla ei kuulu:

- Puidu kui looduslikust materjali loomulikust käitumisest ja iseärasustest tulenevad muutused – paisumine, kahanemine ning toonierinevused
- Detailid, mis on juba värvitud (puidukaitsevahendiga töödeldud)
- Detailid, milles esineb terveid/sissekasvanud oksid, mis ei kahjusta maja stabiilsust
- Puidu struktuuri erinevustest tingitud erinevad värvitoonid, mis ei mõjuta puidu eluiga
- Detailid, milles on (kuivamisest tingitud) väikesed praod/lõhed, mis ei ole läbivad ning ei mõjuta maja konstruktsiooni stabiilsust
- Väändunud puitdetailid
- Katuse- ja põrandalauad, mille mitterahuldavatel pindadel võib esineda hõõveldamata pinda, värvierinevusi ja poomkantsust
- Kaebused, mille on põhjustanud maja asjatundmatu paigaldus või maja vajumine asjatundmatult valmistatud vundamendi tõttu
- Kaebused, mis on põhjustatud omaalgatuslikest muudatustest maja juures, nagu nt puitdetailide ja uste/akende kõveraks tõmbumine asjatundmatu puidu töötlemise tõttu; tormiliistude liiga jäik kinnitamine, ukseraamide krüvimine seinadetailide külge jms.

Garantii alla kuuluvate kaebuste rahuldamine piirdub puuduva/vigase materjali väljavahetamisega. Kõik muud nõudmised on välistatud! Tootja jätab endale õiguse toote tehnilisteks muudatusteks.

Aiamaja värvimine ja hooldus

Puit on looduslik materjal ning kasvab ja kahaneb sõltuvalt ilmastikuoludest. Suured ja väikesed praod, värvitoonide erinevused ning muutused, samuti muutuv puidustruktuur ei ole vead, vaid on puu kasvamise tulemus ning puidu kui loodusliku materjali omapära.

Töötlemata puit (va vundamendiprussid) muutub seistes mõne aja pärast hallikaks, võib tõmbuda siniseks ja minna hallitama. Et kaitsta oma aiamaja puitdetailide, peate Te need koheselt puidukaitsevahendiga töötleva.

Soovitame katta põrandalauad eelnevalt värvitu puiduimmutusvahendiga, eriti laudade alumised küljed, millele pärast maja kokkumonteerimist enam ligi ei pääse. Ainult sel juhul saab takistada niiskuse sisseimbumist.

Soovitame kindlasti töödelda puiduimmutusvahendiga ka uksi ja aknaid. Oluline on uksi-aknaid töödelda kindlasti nii seest- kui ka väljastpoolt! Vastasel korral võivad nad kõveraks tõmbuda.

Pärast maja montaaži soovitame lõplikul viimistlusel kasutada ilmastikuolude kaitseks värvi, mis kaitseb puitu niiskuse ja UV-kiirguse eest.

Värvimisel kasutage kõrgekvaliteedilisi tööriistu ja värve, järgige värvide kasutusjuhendit, tootja ohutus- ja kasutamisharjutusi. Ärge kunagi värvige otsese päikese käes ega vihmase ilmaga. Laske end erialaspetsialistil nõustada töötlemata okaspuu jaoks mõeldud värvide osas ja järgige värvitootja juhiseid.

Reeglipärane maja värvimine pikendab oluliselt Teie aiamaja eluiga. Kord poole aasta järel soovitame Teil maja hoolikalt üle vaadata.

2 Ettevalmistus montaažiks

Töövahendid ja detailide ettevalmistus

Aiamaja montaažiks on Teil vaja järgmisi tööriistu:

montaažiabiline

redel

haamer

vesilood

kruvikeeraja

saag

nuga

mõõdulint

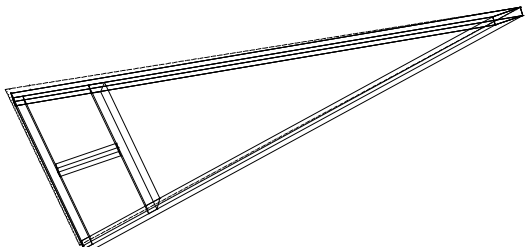

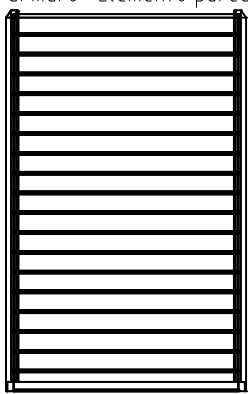

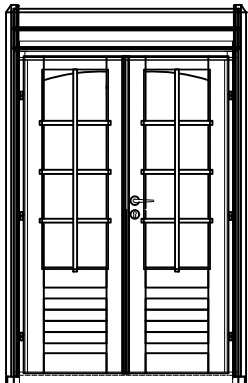

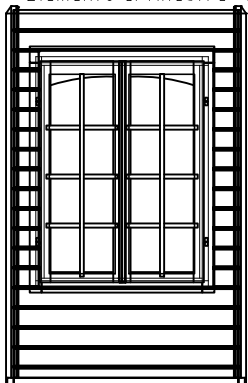

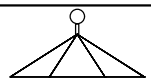

tangid

puur

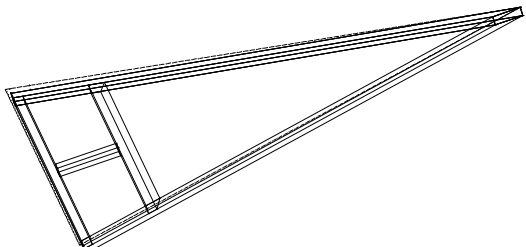

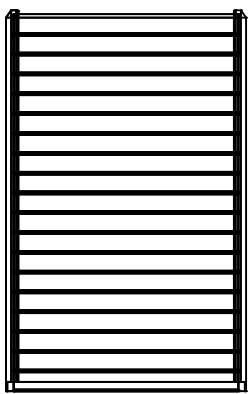

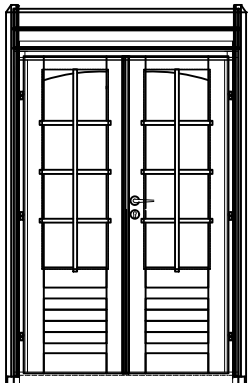

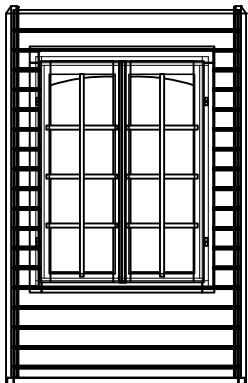

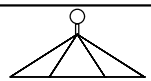

NÕUANNE: Vältimaks võimalikke pinde, soovitame kanda monteerimise ajal vastavaid kaitsekindaid.
